

SYSTEM/MODEL: AP-M

MODIFICATION: Increase receive volume at master station

DIFFICULTY LEVEL: 3 - Moderate - Removal or replacement of internal components.

COMPONENTS REQUIRED 200K Ohm, 2W resistor (if needed)

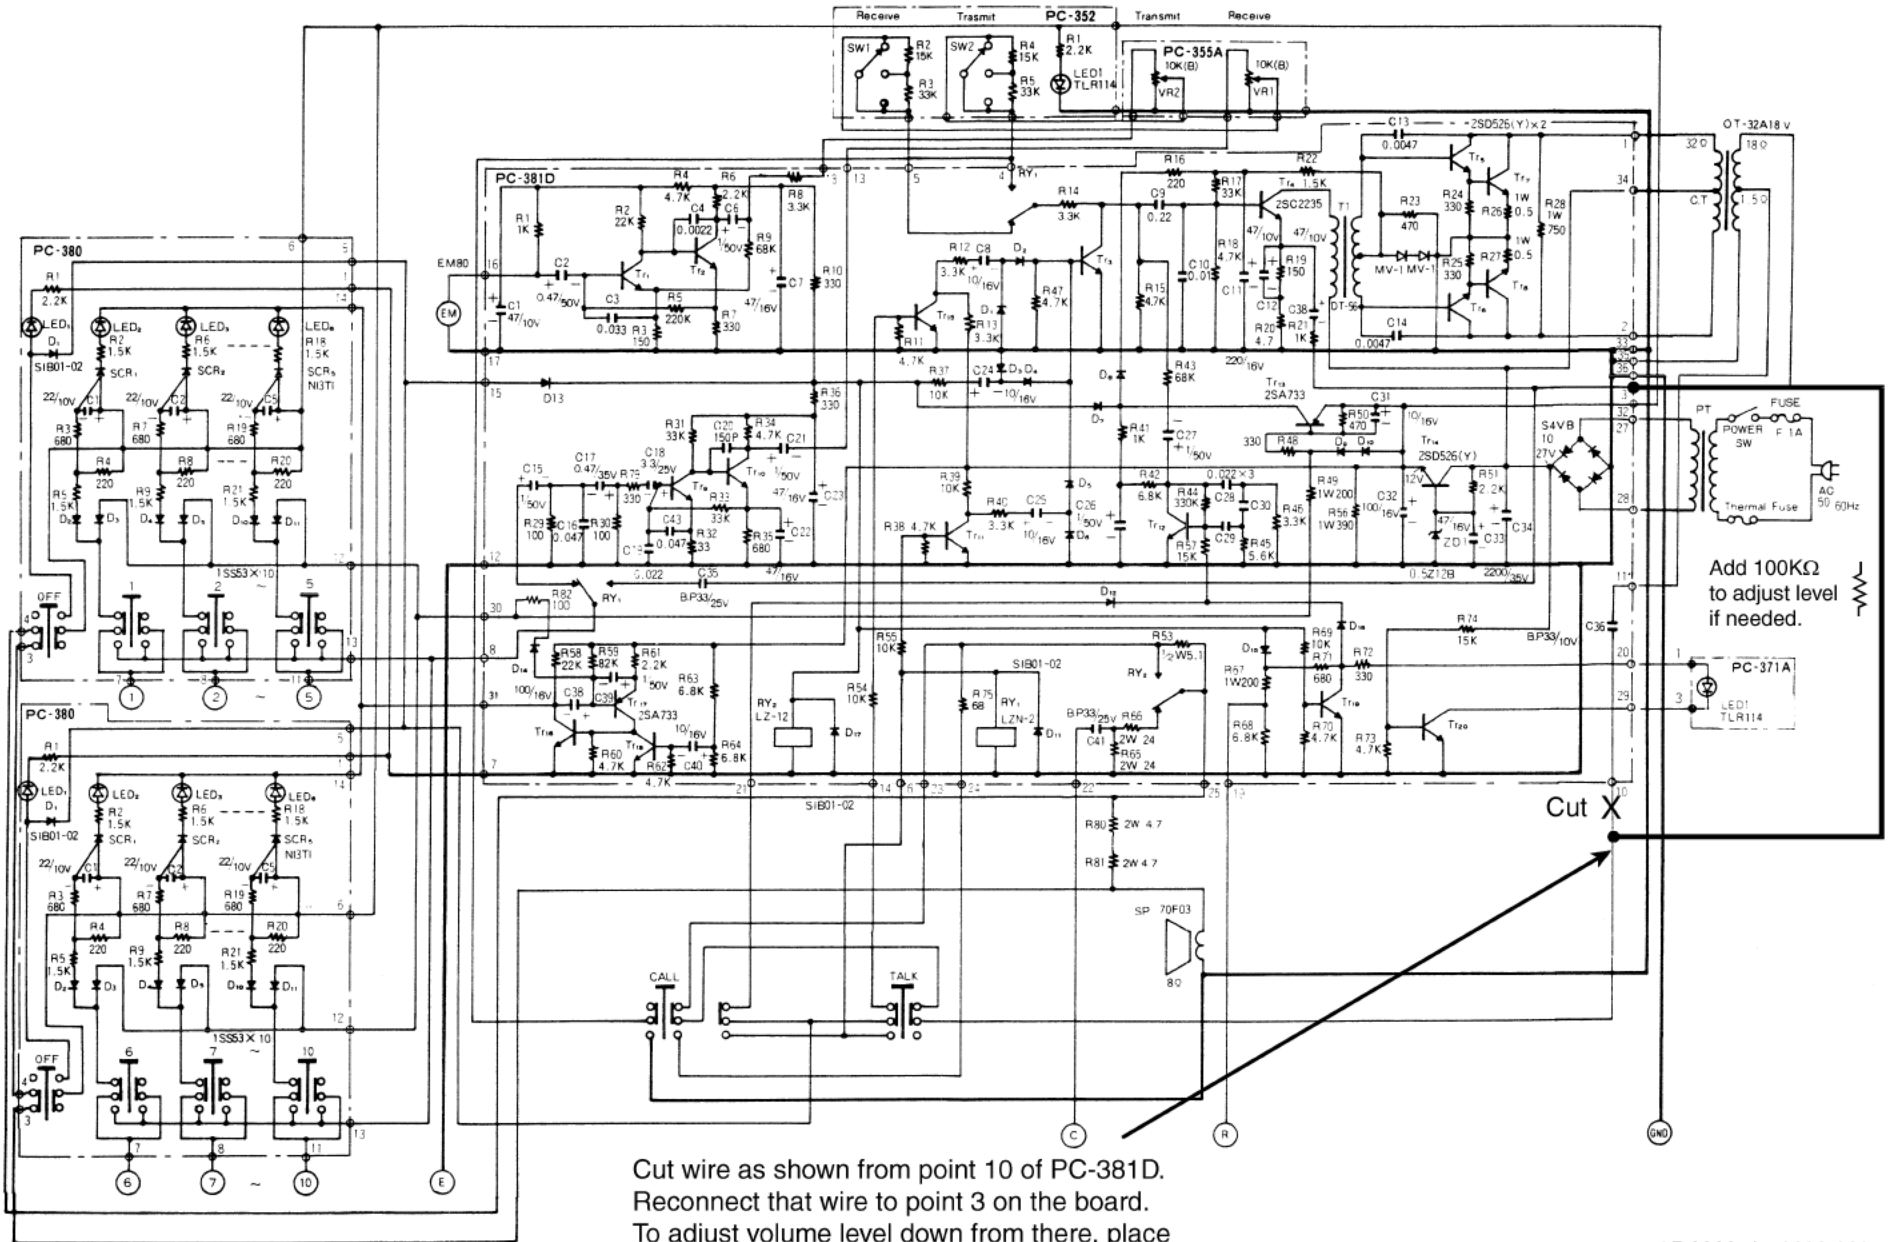

- INSTR/OPERATIONS**
1. Cut wire from point 10 of PC-381D.
 2. Reconnect wire to point 3 of PC-381D.
 3. If volume level needs to be adjusted downward after performing the above modification, place a 200K ohm, 2W resistor in series with the wire going to point 3.

REFERENCE DRAWING #:

Aiphone's product warranty applies to products properly modified using these instructions.
However, if a unit is damaged as a result of improper modification, the warranty does not apply.

INCREASE RECEIVE VOLUME AT AP-M MASTER STATION

AP-10M Schematic Diagram

Cut wire as shown from point 10 of PC-381D.
 Reconnect that wire to point 3 on the board.
 To adjust volume level down from there, place
 a 100KΩ, 2W resistor in series with wire to point 3.
