

Entry Security and Communication Solutions for **CORRECTIONAL FACILITIES**

Protecting Those Who Secure Us

Great for all institution types and sizes!

Local Jails · Prisons · Reformatories
Halfway Houses · Detention Centers

You can depend on Aiphone to improve your facility's surveillance and communication systems. For over 40 years, we have provided a wide variety of solutions for CCTV integration, monitoring, and guard communication. Take the proactive approach by installing Aiphone to ensure your staff's safety. Whether you choose a simple audio intercom or a sophisticated video system, you can rely on us to have security through communication.

Door Stations for Interior / Exterior Use

Prevent unauthorized individuals from getting inside prohibited areas. Keep all gates / entrances locked and use Aiphone door stations to provide communication points for security personnel, visitors, and vendors.

Integrate with a card access system and replace traditional door keys with programmable key cards. Use card reader door stations inside your facility to allow security personnel with access cards into restricted areas.

Select a comprehensive Aiphone system to provide entry security and communication to multiple buildings in a correctional institution campus.

Master Stations for Security Personnel

Control access with Aiphone master stations by identifying visitors / staff before unlocking the door.

Provide staff an efficient way to reach one another with internal communication. Have roaming guards with cell phones? We have a solution! Certain Aiphone systems have a call-transfer option, ensuring each call reaches an actual person.

Integrate with a CCTV system for the ability to switch from the video door / call station view to an alternative view where CCTV cameras are installed.

Install Aiphone anywhere entry security or communication is needed!

*Entrances · Service Areas · Loading Docks · Guard Towers · Sally Ports · Security Control Centers
Employee Break Rooms · Common Areas · Parking Garages · Remote Locations · AND MORE!*

Call Stations for Cell Blocks / Remote Areas

Utilize Aiphone call stations in cell blocks, sally ports, or any interior / exterior location where communication is needed or desired. These provide security personnel a means to immediately call for help when a problem or emergency occurs.

Need communication in remote areas too? Not a problem! Easily reach the security office, guard tower, parking garage, or other remote sites by installing call stations with long distance wiring capabilities.

Discreetly monitor cell blocks, sally ports, prison yards, or anywhere a call station is installed (via the master station). Listen to activity in areas where audio call stations are installed or see and listen to activity in areas where video call stations are installed.

Protect your investment! Many of our call stations are flush mount and vandal resistant, making them ideal for environments where inmates could potentially damage the devices. For further protection, many call stations have a compatible lock box for an additional barrier.

Speaker Stations for Paging / Alerting

Reduce the risk of harm to guards and staff by alerting your facility of potential threats. Integrate with alarms to be sure everyone can hear routine or emergency notifications. Place speakers in prison yards, parking garages, service areas, loading docks, or other noisy environments where louder amplification is needed.

Use new or existing speaker systems so all pages and announcements can be heard throughout the entire building or campus. Respond to a page using hands-free or handset call stations. Choose hands-free stations for open-voice conversations or handset stations for both open-voice and private conversations.

Our intercoms also fit these applications ►

Suggested Systems

Building Security Video Intercom with Mobile Device App* (IX Series)

Use an infinite number of door and master stations

*The IX Mobile app can be downloaded from the Google Play™ store and the Apple® App Store™. Google Play is a trademark of Google Inc. Mobile devices not included.
