

GFO-1DL / GFO-1DLF

Open Voice Tenant Station for the GF System

- INSTRUCTIONS -

The GFO-1DL and GFO-1DLF are open voice tenant stations for the GF system. The unit features door answering and door release with up to five entrance stations, Concierge call, and the connection of an optional panic call station (GFK-PS). A separate standard doorbell can be added to ring the unit with a unique tone. The unit includes TALK, DOOR RELEASE, and CONCIERGE CALL buttons. Each GFO-1DL counts as 2.5 handset stations on a standard GF system, therefore the maximum capacity of the system is 100 stations (see specifications).

NAMES & FUNCTIONS:

COMPATIBILITY:

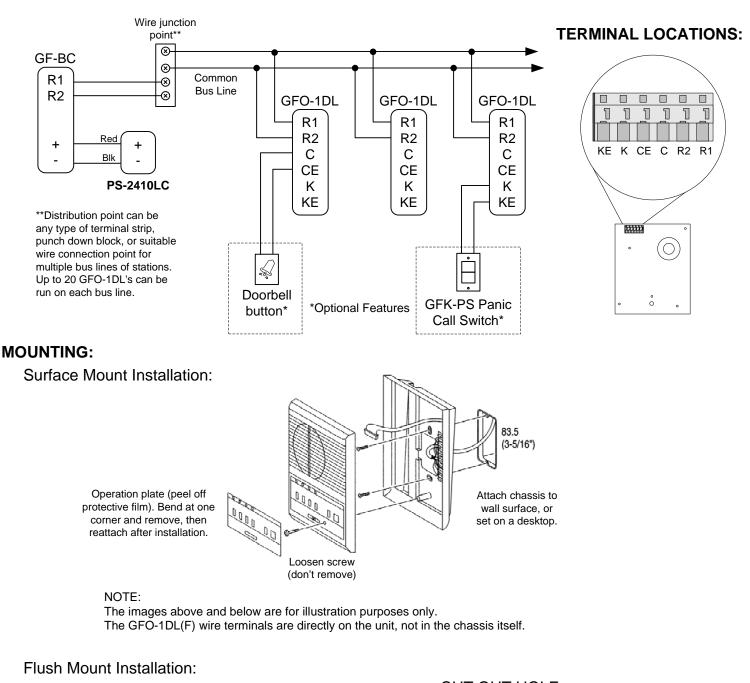

1. The GFO-1DL can be used in any GF system as an audio-only open voice room station. (No video if used in a video system.)

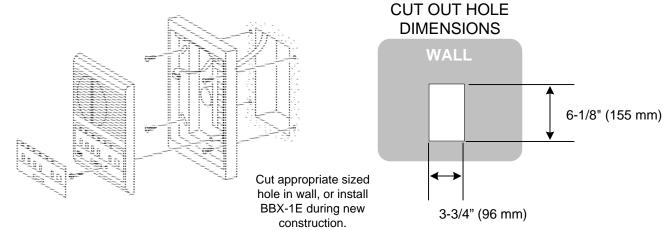

- GF Audio entry with buttons
- GF Audio entry with digital entrance panel
- GF Video entry with buttons
- GF Video entry with digital entrance panel

2. Station capacity of the GF system changes when using open voice tenant stations. Each GFO-1DL occupies the capacity of 2.5 handset or monitor stations, thus lowering the overall number of tenant stations allowed in a system.

WIRING DIAGRAM:

(Entrance panel(s) not shown)

PROGRAMMING & OPERATION:

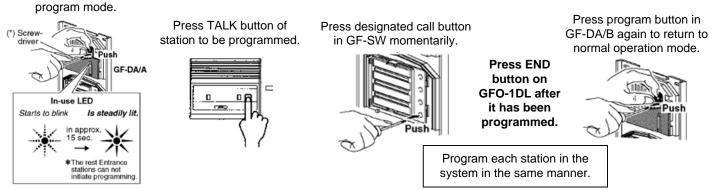

PROGRAMMING THE SYSTEM (INDIVIDUAL BUTTON PANEL):

- 1. Remove faceplate of GF entrance panel.
- 2. Lift rubber cap located on the upper right side of the GF-DA/B speaker module.
- 3. Using a long slender tool, momentarily press the programming button through the hole inside the GF-DA/B.
- 4. The In-Use LED will blink for approximately 15 seconds, then will become steadily lit.
- 5. With In-USE LED steadily lit, press the TALK button momentarily on the GFO-1DL you wish to program. (Only
- one station can be programmed at a time.) Communication will be present (push-to-talk, release-to-listen at unit).
- 6. Momentarily press the call button in the GF-SW that is designated to call that tenant station. A single beep will be heard.
- 7. Press END button on GFO-1DL. (This is like hanging up the handset on a standard GF-1DK model.)
- 8. If the tenant has a second room station:
 - 8a. Press the second unit's TALK button momentarily. Communication will be present.
 - 8b. Press the same call button on the entrance panel. Two beeps will be heard.
 - 8c. Press END button.

NOTE: If five beeps are heard when programming, that is an error indication. Clear the station by pressing and holding the call button on the panel until a continuous beep is heard. Then reprogram by momentarily pressing the call button again and releasing. A short single beep will be heard.

- 9. Repeat steps 5 through 8c to program each room station.
- 10. When programming is completed, press programming switch in GF-DA/B again. In-Use LED will turn off.
- 11. The system is now in regular operating mode.
- 12. Secure the rubber cap and replace the front panel.
- 13. Repeat the above programming process for each entrance panel in the system.

Put Entrance panel in

PROGRAMMING DIGITAL ENTRANCE PANEL* TO CALL GFO-1DL ROOM STATIONS:

- * NOTE: Program tenant's 3 or 4 digit number and name into the GF-NS/A first. Use computer program that comes with the GF-NS/A or enter manually, as shown in the GF-NS/A instructions.
- 1~5. Follow steps 1 through 5 as described above.
- 6. Scroll to tenant's name or number (or enter number with keypad) on entrance panel, then momentarily press BELL button (green-lit BELL symbol). A short beep will be heard.
- 7. Press END button on GFO-1DL. (This is like hanging up the handset on a standard GF-1DK model.) 7a. Program second room station the same way, and two beeps will be heard.
- 8. Continue programming each station in the system in this manner.

Refer to GF-NS/A Instructions for more detail on programming the digital scroll module.

PROGRAMMING THE CONCIERGE STATION (GF-MK) TO CALL GFO-1DL ROOM STATIONS:

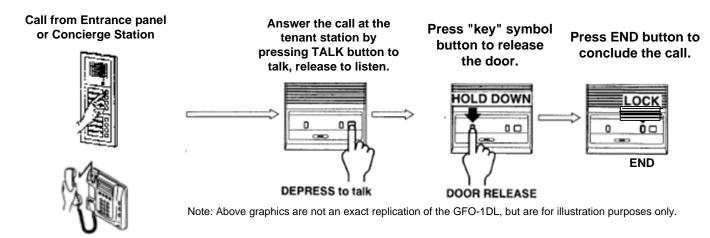

- 1. Put GF-MK into programming mode as described in GF-MK Instructions, page 2-3.
- 2. Lift handset on GF-MK first.
- 3. At tenant station to be programmed, press TALK button. Communication will be established.
- 4. Scroll to tenant's name or number (or enter number with keypad), then momentarily press BELL button (green-lit BELL symbol). A short beep will be heard.
- 5. Press END button on GFO-1DL. (This is like hanging up the handset on a standard GF-1DK model.) 5a. Program second room station the same way, and two beeps will be heard.
- 6. Continue programming each room station in the same manner, then go out of programming mode to return to normal operation.

OPERATION:

 Press the tenant's call button on the entrance panel, and a ring tone will be heard at the tenant station.
If a digital entrance panel is used, enter the tenant's 3 or 4 digit code or scroll to their name, then press the green-lit "bell" button on the entrance panel.

- 2. Answer the call at the tenant station by pressing the TALK button. **NOTE: There is a brief delay when initially pressing TALK, so pause for approximately one second before speaking.**
- 3. Release TALK button to listen to the calling visitor. To speak to caller again, press TALK button. There is no delay on subsequent presses of the TALK button.
- 4. To activate the door release, momentarily press the KEY symbol button. This will activate the door release mechanism at the calling entrance panel. The duration of the release is determined by the door release timer setting on the back of the GF-DA/B audio module.
- 5. To end the conversation, press END button. If END is not pressed, the communication path will automatically time out after approximately 2-1/2 minutes.

NOTE: If the END button was not pressed at the end of the previous call, it must be pressed first before pressing the TALK button to answer a new incoming call.

TROUBLESHOOTING GUIDE:

PROBLEM	POSSIBLE CAUSE	SOLUTION
		When in program mode, press and release call button

SPECIFICATIONS:

System Capacity:	Max. 100 units in a system with all GFO-1DL's. Each GFO-1DL takes the capacity of 2.5 standard GF-1DK handset models If intermixing, multiply each GFO-1DL in the system (including 2nd tenant stations also) by 2.5, then add the number of handsets included. Total number must not exceed 250.
Communication:	Push-to-talk, release-to-listen at tenant station. Press END to conclude call (like hanging up handset)
	Hands free from entrance panel to tenant
Calling:	Electronic ring tone from entrance panel to tenant station
	Differentiated ring tone from individual doorbell
Wiring:	2-conductor common bus wire throughout system. Max. 20 units on each trunk line.
	Run additional independent 2-cond. wire from each unit's doorbell button to unit (if included),
	and 2 cond. from GFK-PS panic switch to GFO-1DL.
Wiring Distance:	GF-BC to farthest GFO-1DL: 980' with 20AWG
-	Total cumulative wire distance must not exceed 1.5 miles (8,200') with 20AWG
Wire:	Use Aiphone wire # 872002. Additional year warranty on the system with Aiphone wire.
Dimensions:	7-1/8" H x 5-5/8" W x 2-1/8" D (GFO-1DL)
	8-1/8" H x 6-1/8" W x 1-3/8" D (GFO-1DLF)

FCC Class B Verification

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are		
designed to provide reasonable protection against harmful interference in a		
residential installation. This equipment generates, uses, and can radiate radio		
frequency energy and, if not installed and used in accordance with the instructions,		
may cause harmful interference to radio communications. However, there is no		
guarantee that interference will not occur in a particular installation. If this		
equipment does cause harmful interference to radio or television reception, which		
can be determined by turning the equipment off and on, the user is encouraged to		
try and correct the interference by one or more of the following measures:		
- Reorient or locate the receiving antenna.		
— Increase the separation between the equipment and receiver.		
— Connect the equipment into an outlet on a circuit different from that to		

- which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE:

Only information pertaining to the GFO-1DL is included here. For complete installation, wiring, programming and operational information, please refer to the GF Installation Manual, GF-MK and GF-NS/A manuals.
