

Entry Security and Communication Solutions for the **HEALTHCARE INDUSTRY**

For Patients, Residents, and Staff

Great for all facility types and sizes!

Clinics • Hospitals • Doctor Offices
Senior Centers • Assisted Living

You can depend on Aiphone *to improve your facility's entry security and communication system. For over 40 years, we have provided a wide variety of easy-to-use, practical, flexible, and affordable security solutions. Take the proactive approach to reduce random violence and theft by installing Aiphone. Whether you choose a simple door answering intercom or a sophisticated video entry system, you can rely on us* **to keep your facility secure.**

Door Stations for Interior / Exterior Use

Ensure residents in assisted living homes or apartments are protected with entry security. Keep all entrances locked and use Aiphone door stations to provide communication points for visitors and staff.

Integrate with a card access system and replace traditional door keys with programmable key cards. Use card reader door stations inside your facility to allow authorized personnel with access cards into restricted areas.

Select a comprehensive Aiphone system to provide entry security and communication to multiple buildings within a healthcare campus.

Master Stations for Administration / Tenants

Control access with Aiphone master stations. Identify visitors and determine their intent before unlocking the door.

Communicate between rooms or use an existing PA system to page, make general announcements, or broadcast emergencies throughout the building(s).

Maintain a secure facility or healthcare campus by monitoring any location where door stations are installed.

Install Aiphone anywhere entry security or communication is needed!

***Entrances · Loading Docks · Offices · Nurse Stations · Exam Rooms · Security Control Centers
Employee Break Rooms · Common Areas · Parking Garages · Remote Locations · AND MORE!***

Sub / Speaker Stations for Common Areas

Reduce the risk of harm to staff and patients / residents by alerting your facility of potential threats. Instantly contact security with a sub station if a situation occurs.

Answer a page using hands-free or handset sub stations. Choose hands-free stations for open-voice conversations or handset stations for both open-voice and private conversations.

Use new or existing speaker systems so all pages, announcements, and emergency notifications can be heard throughout the entire facility or campus.

Nurse Call System for Staff & Patients / Residents

Save time and sustain high-quality care with Aiphone's nurse call system. Caregivers can visualize and prioritize the urgency of multiple calls, while having the convenience of staff-to-patient / resident communication.

Ensure patients / residents have vital access to their nursing staff. With bedside call buttons and urgent call pull cords, help can be reached at any time.

Alert staff of an incoming call, even if they are away. With the optional duty station, personnel is notified if an incoming call is sent to the master station.

Emergency Stations for Healthcare Campuses

Deter prowlers by installing emergency towers with dual-call stations around your campus. Staff, visitors, and patients / residents can call for urgent help or for general assistance.

Place emergency wall boxes with dual-call stations in parking garages, stairwells, or other remote areas where trouble might be lurking.

Install dual-call stations independent from the emergency wall boxes or towers if emergency calling is needed in areas where the wall boxes or towers will not fit.

Our intercoms also fit these applications ►

Urgent Care

Maternity

Pharmacy

Suggested Systems

Healthcare Security Video Intercom with Mobile Device App* (IX Series)

Use an infinite number of door and master stations

*The IX Mobile app can be downloaded from the Google Play™ store and the Apple® App Store™. Google Play is a trademark of Google Inc. Mobile devices not included.

Healthcare Security Video Intercom (IS Series)

Use up to 20 door/sub stations, 20 master stations, and 120 room stations

Need a larger capacity?

No problem! The IS Series can scale to over 5,000+ stations when using the optional IP devices.

Multi-Tenant Community Video Intercom (GT Series)

Use up to 16 entrance stations, 4 guard/concierge stations and 500 tenant stations

Both direct select and digital scroll stations are available!

If exceeding 24 tenant stations, Aiphone recommends using the digital scroll option.

7" Touchscreen Video Intercom (JP Series)

Use up to 4 door stations and 8 master stations

Starter kits available!

Lamp Memory Intercom (NEM Series)

Use up to 40 door/sub stations and 2 master stations

Nurse Call Intercom (NHX Series)

Use up to 1 master station, 1 duty station, and 80 patient/resident stations
