A	192.U.I.4U Spraker on	Mic off	

STEP 3:

Click on "Admin" menu again, then click on "Configure Intercoms".

STEP 4:

Intercom Configuration Tool will search for IP-EWST automatically. Determine if the network is static or dynamic, by asking clients IT dept. If dynamic click on "Assign IP automatically with DHCP" button. If static enter the appropriate information into the "IP Address", "Subnet Mask", "Gateway", and "Port". Information can be obtained from clients IT department. Enter location name in field to identify substation location.

STEP 6:

Assign the Fail Forward IP address'. If not using this feature skip to Step 7. Enter IP address of fail forward PC's in "Fail Forward IP1,2,3" location.

STEP 7:

Assign relay feature. If not using this feature skip to Step 8. If "Advanced Settings" is not visible click on "View" menu, then click on "Advanced". Activate feature by clicking on "Door / Relay Control" button. Next enter the amount of time that the relay needs to stay latched in seconds in the "Door Relay Activate" field. Max. time is 255 seconds. Relay can also be activated when either the Speaker, Microphone, or both are activated by clicking on the "Activate On" button, and then choosing either "Mic" or "Speaker".
