

Entry Security and Communication Solutions for **SCHOOLS & DISTRICTS**

Securing Students and Staff

Great for all school types and sizes!

Preschool • K-12 • Private • Charter
Montessori • Boarding • Higher Edu.

You can depend on Aiphone to improve your school's entry security and communication system. For over 40 years, we have provided a wide variety of easy-to-use, practical, flexible, and affordable security solutions. Take the proactive approach to reduce random violence and theft by installing Aiphone. Whether you choose a simple door answering intercom or a sophisticated video entry system, you can rely on us **to keep your school secure.**

Door Stations for Locked Entrances

Prevent dangerous individuals from getting inside your school. Keep all entrances locked and use Aiphone door stations to provide communication points for visitors and parents.

Integrate with a card access system and replace traditional door keys with programmable key cards. Use card reader door stations inside your school to allow authorized personnel with access cards into restricted areas.

Select a comprehensive Aiphone system to provide entry security and communication to multiple buildings on a campus or in a district.

Master Stations for Offices

Control access with Aiphone master stations. Identify visitors and determine their intent before unlocking the door.

Give faculty an efficient way to communicate with classrooms and other offices. Use an existing PA system to page, make general announcements, or broadcast emergencies throughout the building(s).

Maintain a secure school or campus by monitoring any location where door / call stations are installed.

Install Aiphone anywhere entry security or communication is needed!

*Entrances · Administration Offices · Classrooms · Reception Desks · Security Control Centers
Faculty Break Rooms · Common Areas · Parking Garages · Remote Locations · AND MORE!*

Room Stations for Classrooms

Reduce the risk of harm to students and staff by alerting your school of potential threats. Instantly reach the main office with room stations if a situation occurs.

Answer a page using hands-free or handset room stations. Choose hands-free stations for open-voice conversations or handset stations for both open-voice and private conversations.

Use new or existing speaker systems so all pages, bells, announcements, and emergency notifications can be heard throughout the entire school or district.

Call/Speaker Stations for Common Areas

Utilize Aiphone call stations in areas prone to vandalism, theft, or violence. These provide your students and staff a means to immediately call for help when a problem or emergency occurs.

Place speakers in cafeterias, hallways, playgrounds, or other noisy environments where louder amplification is needed. Integrate with bell schedules to be sure everyone is alerted during routine class changes or during emergency notifications.

Emergency Stations for School Campuses

Deter prowlers by installing emergency towers with dual-call stations around your campus. Students and staff can call for urgent help or for general assistance.

Place emergency wall boxes with dual-call stations in parking garages, stairwells, or other remote areas where trouble might be lurking.

Install dual-call stations independent from the emergency wall boxes or towers if emergency calling is needed in areas where the wall boxes or towers will not fit.

Our intercoms also fit these applications ►
