	GTW-LC	Lift control adaptor	x	●	●
	GH-RY	External activation relay	x	●	●
	GT-RY	External activation relay	x	●	●

● = Compatibile   x = Not Compatible

FOOTNOTES:

1 Panel fits, but it has "GH System" printed on the front.

2 Compatible, but the backlighting of the directory may not be bright enough.

3 The upper viewing area (corners) will be partially blocked by the rainhood.

4 Basic functions work, but GT-specific functions do not work, such as PTZ, image adjustment,
   CCTV camera switching, and door release while calling.

5 This works but it is not recommended. (Unlikely combination)

6 If using a GT-BC in a GF or GH system with a PS-2410LC, power the BC and VBC with their own PS-2410LC's.
   When a PS-2420UL is used, common the power supply between the BC and VBC.

7 Compatible but must use 2 power supplies. 1 for BC, 1 for VBC.

8 Some basic functions work. Link transfer function doesn't work. GT-Specific functions don't work, such as
   PTZ image adjustment, and door release while calling.

9 GH-MK used in a GT system with GT-2C: Missed call notification from concierge will not be displayed on GT-2C.
