## 

## IX Series Video Door Station Streaming to Avigilon<sup>™</sup> ACC 5

The IX Series video door stations can be viewed by the Avigilon ACC 5 client using the RTSP connection method. By default, IX Series video door stations have the second video stream turned on and set to stream using the H.264 protocol. When configuring, verify door station settings.

## **Avigilon Client Screen Setup**

Configuring with ONVIF instead of RTSP may cause errors. If ONVIF method was used, cycle power to the video door station and configure using the RTSP method described below. Launch the control center client and log in.
