

Caution!

Updating device firmware from 1.XX to 2.00 or later will reset the device back to its original factory settings, and will delete all the information stored in the device(s).

Make sure to back up the setting file before updating firmware.

After updating firmware, upload the setting file to each station.

Please download and use 5.0.0.0 or later version of IX Support Tool to update the firmware in IX devices.

Please refer to “Firmware Update Guide.pdf” included in the zip file.

Spanish and French manuals will be made available shortly.
