

GTN-1A/F/SS+CPROX/WAVE

Touch Free Audio Entrance Station

Description:

The GTN-1A/F/SS+CPROX/WAVE is a 1 way audio touch free flush stainless steel entrance station with universal prox cutout.

The panel uses a sensor to detect the visitors hands at 10cm distance. This allows for touch free calling and also prevents any motion from triggering a call beyond that range in order to avoid false activation.

It is designed to be flush mounted, with a robust housing for outdoor use.

Features:

- Touch free calling with prox cutout
- Call to indoor station
- Simple 2 wire system
- Sensor button illuminated blue on stand by and changes to green to indicate activation
- COVID-Secure environment
